

FEATURES

- Standard Sound Attenuated Units reduce noise emissions to no more than 70 dB at 30 feet (9 meters)
- Large, lockable doors provide easy access to the interior for operational controls, routine service and fueling
- The entire enclosure, its individual panels and all doors are removable to allow complete access during maintenance or major overhauls
- Technosub's innovative Environmental Box captures venturi blow by, separates and silences the air exhaust and returns liquid to the pump suction
- DOT approved highway trailer with front and rear jacks, fenders and lights is an available option
- Wide range of suction and discharge fittings including Technosub's own "QD" Quick Disconnect fittings and accessories
- Technosub's Sound Attenuated Trash Auto Prime (TAP) pumps provide an economical, dependable and highly efficient automatic self-priming pumping solution enclosed in a neat and quiet enclosure
- Other Technosub models of pumps, including Trash Vacuum Prime (TVP), High-Pressure Auto Prime (HAP), Centrifugal Wellpoint (CWP) and Rotary Wellpoint (RWP) are available with Sound Attenuated Enclosure options

Technosub® sound attenuated enclosures are ideally suited for operations in residential and other areas where noise reduction is an important consideration.

Made of 12-gauge Galvannealed-Steel (or optional stainless steel), panels are insulated with a 1-1/4 inch thick fire retardant acoustical foam to reduce noise level to no more than 70 db at 30 feet (9m). Custom db levels are available to meet design requirements.

Designed for upward exhaust of combustion gases and cooling air. Panels are removable for maintenance and repair. Panel doors, with locks, provide easy access to the pump, engine, priming system, and controls for routine servicing, lubrication, and fueling.

Specifications and illustrations are subject to revision without notice. Technosub is not liable for any consequential, incidental or indirect damages relating to these specifications.
