Technosub® Standard High Head Auto Prime pumps are specifically designed to effectively handle a wide range of liquids in applications such as liquid transfer, wash down, fire protection, fracking and jetting where high heads and pressure are required.

Technosub Standard High Head Auto Prime pumps provide a dependable, highly efficient solution in a completely automatic priming pump.

The model 4TSHAP is capable of achieving maximum flows of 1375 gpm (312 m³/h) and maximum total head of 380' (115 m), with solids handling up to 5/8" (15 mm) in diameter.

The standard 4TSHAP is powered by a water-cooled, 4-cylinder diesel engine. Alternative drives are available, including other diesel engines or electric motor options.
