

HANDLE YOUR TOUGHEST MUD PROBLEMS

WITH OUR MX SERIES AGITATOR

PRODUCT FEATURES

Our robust MX3 submersible agitator is specifically designed to agitate water basins where sediment beds form.

Equipped with three strategically positioned nozzles, it creates a powerful vortex effect, enabling efficient agitation in sumps or reservoirs of various shapes. Its design ensures quick and easy installation in sumps as it does not require any guide bar system.

Highly effective in sumps ranging from 10 to 30 meters (30 to 100 feet) in diameter and offering excellent abrasion resistance, it is perfectly suited for the mining industry!

KEY FEATURES INCLUDE

- **Abrasion resistance:** Thanks to its 1/4-inch rubber coating that protects hydraulic parts.
- **Simplicity of installation:** Because it is handled like a submersible pump, the MX agitator is easy to install and set-up.
- **Flexibility of installation:** With Victaulic grooves, it enables the connection of hydraulic pipes to increase the agitation radius, offering flexibility and performance.
- **General informations:**
 - **Power:** 20 HP (15 kW)
 - **Voltage:** 575 Vac
 - **Weight:** 670 lbs (304 kg)
